

Field Engineering Services

your local engineering and technical resource

Engineered to Perform Under Pressure

As your local distributor of high quality fluid system components and assemblies, Swagelok® is there to provide superior products and services backed by our unique limited lifetime warranty. As your high performance resource, Swagelok field engineers can share their expertise to help you develop solutions for complex problems.

Are you:

- Dealing with persistent fluid system problems?
- Seeking advice on selecting the right products or services for a particular application?
- Facing an increasing workload with limited internal resources?
- Looking for guidance or training on installation or service of fluid system components or system troubleshooting?

Our field engineers know your systems and are ready to help. They are thoroughly familiar with fluid system applications in the most demanding commercial industries — including oil and gas, aerospace, chemical processing, and power.

Pressure Brings Out the Best in Us

Technical knowledge is an essential element of your success, and sometimes you don't know what you need — until you need it. Swagelok field engineers have the ability to help you strengthen your processes and position you for success. We'll take a look at your systems and provide you with knowledge and advice to get you where you need to be.

Swagelok®

How can we help?

Swagelok® field engineers use their application expertise and match it with a broad knowledge of Swagelok products and solutions that will help your facilities operate at peak performance. They can also help with installation, safety training, life-cycle cost analysis and suggest system improvements.

SERVICE CAPABILITIES

Bring us your toughest challenge. Swagelok Southern California's experts will perform an onsite evaluation of your systems and offer recommendations that will improve your operations, make it more cost-effective, and improve employee safety. A detailed report provided after the audit is tailored to your specific challenges and concerns.

Choose from:

- Fluid System Advisory Services
- Hose Advisory Services
- Gas Distribution Evaluation & Advisory Services
- Compressed Gas Leak Detection
- Energy Emission Survey

Optimize Resources

Efficiency is a primary concern for your work. Field engineers assess and offer resource optimization through:

- Repair prioritization
- Design services
- Fabrication and assembly services
- Product selection consulting
- Bill of materials (BOM) and piping and instrumentation diagram (P&ID) generation
- Customer training on best practices
- Preventive maintenance recommendations

Reduce Costs

The price of product is not the only, or oftentimes even the best, judge of ways to save money. Field engineers can work with you to reduce cost through:

- Design optimization opportunities
- Installation errors
- Preventing costly leak points
- Opportunities to improve accuracy
- Component substitution for longer life expectancy overtime
- Inventory reduction possibilities
- Standardization opportunities

Promote Safety

You trust Swagelok products to perform safely. Field engineers support these best practices from selection to installation to operation through:

- Leak detection
- Design risk evaluation
- Product selection assistance
- Fluid, sample, and steam system analysis
- Training and process recommendations

Increase Uptime and Reliability

You expect reliability, but what if your system could actually improve? Field engineers are trained and certified to identify these opportunities in a number of areas:

- Leak detection and potential failure point identification
- Component selection for peak system life span
- Component registry for faster replacement
- Optimized sampling system design, reducing unnecessary analyzer calibrations and process changes
- Hose selection, installation, and maintenance recommendations

SCHEDULE AN APPOINTMENT

Swagelok Southern California

Greater Los Angeles area, Central Coast
Phone: (800) 252-7087

Orange / San Diego counties, Inland Empire, Baja Peninsula

Phone: (858) 320-4000

Email: info@socal.swagelok.com

Web: socal.swagelok.com

Swagelok Hawaii

Phone: (800) 252-7087

Email: info@hawaii.swagelok.com

Web: hawaii.swagelok.com

Swagelok Southern California and Swagelok Hawaii are authorized Swagelok sales and service centers.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative, listed above.

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.
